

iRobot Roomba 960 Debris Extractor Replacement

This guide will instruct you how to replace the debris extractors in the iRobot Roomba 960.

Written By: Vanessa Greyson

INTRODUCTION

This guide will instruct you how to replace the debris extractors in the iRobot Roomba 960.

PARTS:

- [Tangle-Free Debris Extractor Set For Roomba 800 and 900 Series](#) (1)
-

Step 1 — Debris Extractor

- Turn the Roomba upside down and orient it so that the wheels are facing upwards and the dustbin is furthest from you.

Step 2

- Pinch the two yellow tabs that are located near the dustbin towards each other to open the frame.

Step 3

- Lift the frame to expose the two debris extractors.

Step 4

- Carefully apply pressure to one side of the first debris extractor to release it. Lift to remove.
- Do the same to the second debris extractor.

To reassemble your device, follow these instructions in reverse order.
